

*“Hope is
not a
plan”*
~Atul Gawande

In 2014 Harvard surgeon and writer Atul Gawande published the best-seller Being Mortal about modern medicine and the culture's difficulty with accepting death. This documentary, Being Mortal tells the story of Dr. Gawande who is learning to think about death and dying in the context of being a healer. By sharing stories from both physicians and the people and families he encounters, including his own, the documentary shares new light on how our system so often focused on a cure, neglects the important conversations that need to happen so that a person's true priorities can be known and honored.
