Smart Meters Are Coming.

Your neighborhood will get new, state-of-the-art meters in a few months.
How will a smart meter help me?

Your smart meter will let you keep track of how you are using energy and help you manage your bill.

- **Connect to Solar**: Smart meters will make it easier to integrate solar energy with the grid.
- **Control Costs**: Manage your costs with online access to detailed daily usage information.
- **No More Waiting**: Remote meter reading means no more waiting for a meter reader, and no more estimated bills.
- **Faster Restoration**: Smart meters will notify us when your power goes out. That means faster restoration.
- **Easier Activation**: Remote activation means easier service transfer or activation.
- **Greener Choices**: Use information from your smart meter to make wiser energy decisions that help the environment.
- **High Bill Alerts**: Set up high-bill alerts (and get tips on how to avoid them).

**Easy Installation**

- Installation is quick, with only a brief disruption to your power.
- You don’t need to be home for the installation unless you need to be home for your meter reading. If you need to be there, we’ll let you know soon how to make an appointment.
- You’ll find a note on your door when we’re done.
